COMPUTERS & GEOSCIENCES

An International Journal devoted to the rapid publication of computer programs in widely used languages and their applications

Editor-in-Chief:
D. F. Merriam, Stratigraphic Studies Group, Box 153, Wichita State University, Wichita, KS 67208, USA
BITNET: SSGWSU at TWSUVM *Fax:* 316 689-3770 *Telex:* 417 423

Managing Editor:
L. Brane, Stratigraphic Studies Group, Box 153, Wichita State University, Wichita, KS 67208, USA

Associate Editors:
F. P. Agterberg, Geological Survey of Canada, 601 Booth Street, Ottawa, Ontario, Canada K1A 0E8
J. M. Cubitt, Geochem Group, Chester Street, Saltney, Chester CH4 8RD, UK
D. M. Hawkins, Department of Applied Statistics, University of Minnesota, St. Paul, MN 55108, USA
R. J. Howarth, BP Research Centre, Chertsey Road, Sunbury-on-Thames, Middlesex TW16 7LN, UK
R. W. LeMaitre, Department of Geology, University of Melbourne, Parkville, Victoria 3052, Australia
D. C. Peters, U.S. Bureau of Mines, PO Box 25086, Building 20, Denver, CO 80225, USA

Book Review Editor:
G. F. Bonham-Carter, Energy, Mines & Resources Canada, Mathematical Applications in Geology Section, Continental Geoscience and Mineral Resources, Room 694, 601 Booth Street, Ottawa, Ontario, Canada K1A 0E8

Software Review Editor:
J. C. Butler, Department of Geosciences, University of Houston, Houston, TX 77004, USA

Assistant Editors
J. C. Brower (USA)
F. Chayes (USA)
M. L. Crawford (USA)
G. deMarsily (France)
J. Doveton (USA)
A. G. Fabbri (The Netherlands)
F. Gradstein (Canada)
J. K. Hall (Israel)
J. T. Hanley (USA)
U. C. Herzfeld (USA)
D. G. Jewett (USA)
A. Khan (UK)
E. Kirova (USA)
R. Pflug (Germany)
J. E. Robinson (USA)
N. M. S. Rock (Australia)
W. Schwarzacher (UK)
B. R. Shaw (USA)
P. G. Sutterlin (USA)
H. Teil (France)
J. C. Tipper (Australia)
G. V. Wolf (USA)

Editorial Correspondents
L. Carbognin (Italy)
H. A. F. Chaves (Brasil)
A. C. Cook (Australia)
I. Djafarov (USSR)
G. Gaal (Finland)
D. Gill (Israel)
J. Harff (Germany)
Liu Chengzuo (China)
P. Macquire (UK)
V. Nemec (CSSR)
N. Nishiwaki-Nakajima (Japan)
M. Pena Daza (Bolivia)
R. A. Reyment (Sweden)
W. Scherer (Venezuela)
J. H. Schuenemeyer (USA)
H. Wackernagel (France)
V. T. Vuchev (Bulgaria)
Zhao Pengda (China)
P. J. Yarka (USA)

Officers and Council of the IAMG (1989–1992)
President: R. B. McCammon (USA)
Past President: J. C. Davis (USA)
Vice President: J. Aitchison (Hong Kong)
Secretary General: M. E. Hohn (USA)
Treasurers: J. O. Kork (USA)
V. Nemec (CSSR)

Council Members
P. I. Brooker (Australia)
C.-J. Chung (Canada)
J. M. Cubitt (UK)
K. H. Esbensen (Norway)
A. Marechal (France)
N. Nishiwaki-Nakajima (Japan)
R. A. Olea (USA)
Editor of *Journal of Mathematical Geology:* R. Ehrlich (USA)
Editor-in-Chief of *Computers & Geosciences:* D. F. Merriam (USA)
Editor of *Newsletter:* J. R. Carr (USA)

Publishing Office: Pergamon Press plc, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England [*Tel.* Exeter (0392) 51558; *Fax* 425370].

Subscription and Advertising Offices: *North America:* Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, USA; *Rest of the World:* Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, UK [*Tel.* Oxford (0865) 794141].

Publication Frequency: 10 issues per annum: Annual institutional subscription rate (1992): £530.00 (US$960.00). Two-year institutional rate (1992/93): £1007.00 (US$1824.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan are available on request.

Back Issues: Back issues of all previously published volumes, in both hard copy and in microform are available direct from Pergamon Press offices.

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

Photocopying information for users in the USA: The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid. The appropriate remittance of US$3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970, USA.

Permission for other use: The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-fee Code for this publication is: 0098-3004/91 $3.00+0.00

♾™The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

List of Contents

NUMBER 1

David M. Legler and I. M. Navon — 1 — VARIATM—a FORTRAN program for objective analysis of pseudostress wind fields using large-scale conjugate-gradient minimization

Kenneth C. Hardcastle and L. Scott Hills — 23 — BRUTE3 and SELECT: QUICKBASIC 4 programs for determination of stress tensor configurations and separation of heterogeneous populations of fault-slip data

Robert J. Rosenbauer — 45 — UDATE1: a computer program for the calculation of uranium-series isotopic ages

K. L. Currie — 77 — GENORM: a generalized norm calculation

Bryson C. Bates and Neil R. Sumner — 91 — RECRES: a FORTRAN-77 program for detecting model misspecification in multiple linear regression

E. C. Grunsky and F. P. Agterberg — 115 — FUNCORR: a FORTRAN-77 program for computing multivariate spatial autocorrelation

E. C. Grunsky and F. P. Agterberg — 133 — SPFAC: a FORTRAN-77 program for spatial factor analysis of multivariate data

Short Notes

J. R. Muhling and B. J. Griffin — 161 — On recasting garnet analyses into end-member molecules—revisited

Carol A. Gotway — 171 — Fitting semivariogram models by weighted least squares

NUMBER 2

Jean-Pierre Chanut and Bertrand Pelletier — 173 — STRATE: a microcomputer program for designing optimal stratified sampling in the marine environment by dynamic programming—I. Theory and method

Bertrand Pelletier and Jean-Pierre Chanut — 179 — STRATE: a microcomputer program for designing optimal stratified sampling in the marine environment by dynamic programming—II. Program and example

Robert A. Crovelli and Richard H. Balay — 197 — A microcomputer program for energy assessment and aggregation using the triangular probability distribution

Michael J. Swenson and Charles J. Waag — 227 — TEEPLOT—a Microsoft Quick-BASIC program for the analysis of clast morphology

Christophe Tourneret and Philippe Laurent — 251 — A new computer method for rapid and precise determination of calcite crystallographic orientation from *U*-Stage measurements

Jamal N. Al Abbasi and Khalid J. Fahmi — 271 — GEMPAK: a FORTRAN-77 program for calculating Gumbel's first, third, and mixture upper earthquake magnitude distributions employing maximum likelihood estimation

COGS Contribution

Matthias Weger — 291 — ELLIROT—a program to view and analyze spatial distributions of ellipses

Short Notes

Joe Bibbo, Delores Etter, and Dale Breding — 301 — A software tool for processing seismic data

D. Rameshwar Rao, Vinay M. Choubey, and T. V. Subba Rao — 307 — ITHERM: a BASIC program for magnetite–ilmenite thermometry

Software Reviews — 315

321

329

NUMBER 3

Chris J. Moran and Alex B. McBratney — 335 — STRUCTURA: a C program for estimating attributes of two-phase, heterogeneous structures digitized from planar specimens

Jan I. Kristiansen — 351 — NEPR: a FORTRAN-77 program for determining thermal conductivity and diffusivity by needle-probe inversion

Gawen R. T. Jenkin, A. E. Fallick, C. M. Farrow, and G. E. Bowes — 391 — COOL: a FORTRAN-77 computer program for modeling stable isotopes in cooling closed systems

T. Graham Freeman — 413 — Calculating catchment area with divergent flow based on a regular grid

Michael R. Murray and Dale E. Baker — 423 — MWINDOW: an interactive FORTRAN-77 program for calculating moving-window statistics

Brett J. Larkin — 431 — An ANSI C program to determine in expected linear time the vertices of the convex hull of a set of planar points

Alfred Lacazette — 445 — A new stereographic technique for the reduction of scanline survey data of geologic fractures

Short Note
G. W. Carroll and N. M. S. Rock — 465 — ISOCALC: a simple Rb–Sr and Sm–Nd isotopic calculator for the Apple Macintosh

Reviews — 469

NUMBER 4

Laura Carbognin and Giancarlo Taroni — 477 — Correlation between percentage matrices: a new approach

B. Berkowitz and M. Ben-Zvi — 489 — An algorithm and Pascal program for geostatistical mapping

Christopher M. Prince — 505 — DECODE and DFOUR: 2-D Fourier processing of petrographic images

Leland R. Dexter and Charles C. Avery — 527 — Using spreadsheet software in water-balance modeling

J. M. Kirby — 537 — Multiple functional regression—I. Function minimization technique

Ramesh Kumar T. Reddy — 549 — Digital analysis of lineaments—a test study on South India

Alexander Hagens and John H. Doveton — 561 — Application of a simple cerebellar model to geologic surface mapping

G. Frapporti, L. A. M. Linnartz, and S. P. Vriend 569 SPEARMEN—a dBase program for computation and testing of Spearman rank correlation coefficient distributions

Reviews 591

Letter to the Editor 595

Call for Papers I Special issue of *Computers & Geosciences* "Spatial Programming in the Geosciences"

NUMBER 5

John C. Tipper 597 FORTRAN programs to construct the planar Voronoi diagram

Jeffrey L. Becklehimer 633 A FORTRAN program for computing beam patterns of geophone arrays

Luc Harnois 641 TEA: a computer program in BASIC to calculate trace-element abundances in silicate rocks and magmas during melting and crystallization processes

D. Bhaskara Rao and N. Ramesh Babu 655 A FORTRAN-77 computer program for three-dimensional analysis of gravity anomalies with variable density contrast

Charles E. Barton and Chris Z. Tarlowski 669 Geomagnetic, geocentric, and geodetic coordinate transformations

Yaoling Niu and Rodey Batiza 679 DENSCAL: a program for calculating densities of silicate melts and mantle minerals as a function of pressure, temperature, and composition in melting range

P. H. A. Sneath and J. C. Radbourne 689 DOTDND: a FORTRAN-77 program for showing graphically the confidence or uncertainty in phylogenetic trees

COGS Contribution
Kenneth F. Sprenke 719 Gravity modeling with Lotus 1-2-3

Reviews 727

Corrigendum 729

NUMBER 6

J. S. Robertson, W. L. Siegmann, and M. J. Jacobson 731 OS2IFD: a microcomputer implementation of the parabolic equation for predicting underwater sound propagation

Steven E. Franklin, Derek R. Peddle, Bradley A. Wilson, and Clayton F. Blodgett 759 Pixel sampling of remotely sensed digital imagery

Doo Jung Jin and Richard J. Colby 777 A BASIC program to compute seismic surface-wave group-velocity dispersion curves

Dieter Krejci and Carl Richter 801 SPLIT: a Turbo-C program for the graphical representation and separation of fault-slip data sets

Gerardo M. E. Perillo and Maria Cintia Piccolo	813	An interpolation method for estuarine and oceanographic data
M. Rosensaft	821	LINPIX—a program to convert thematic maps into pixel matrices
Short Notes		
Brett J. Larkin	841	An ANSI C routine to determine if a point is within a specified convex polygon in logarithmic time
Nicholas M. S. Rock	849	Towards a comprehensive database of geoscience software: a Macintosh directory of published programs
Reviews	855	

NUMBER 7

G. Macedonio and M. T. Pareschi	859	An algorithm for the triangulation of arbitrarily distributed points: applications to volume estimate and terrain fitting
J. Buys, H. J. Messerschmidt, and J. F. Botha	875	Including known discontinuities directly into a triangular irregular mesh for automatic contouring purposes
W. Apon	883	A new algorithm for coding geological terminology
J. M. Kirby	895	Multiple functional regression—II. Rotation followed by classical regression technique
Pierre D. Glynn	907	MBSSAS: a code for the computation of Margules parameters and equilibrium relations in binary solid-solution aqueous-solution systems
Barbara L. Sherriff, Vijay Singh, Jianjie Liang, and H. Douglas Grundy	967	CHEMSHIFT: a FORTRAN program to calculate ^{29}Si MAS NMR chemical shift of silicate minerals
D. G. De Paor	973	Computer-aided pole figure construction
Colin Ware, William Knight, and David Wells	985	Memory intensive statistical algorithms for multibeam bathymetric data
K. L. Mickus and M. R. Baker	995	Program to correct anomalous subsurface temperature gradients resulting from surface temperature variations
Maria M. Astiz, Antoni M. Correig, and Ramon Ortiz	1009	A numerical filter for the restitution of digital seismograms
Peter H. McGrath	1017	ZERO CROSSOVER—a FORTRAN program to determine the dip and extent of a geological boundary using horizontal derivatives of upward-continued gravity data
COGS Contribution		
Solomon S. Katz	1033	Emulating the Prospector Expert System with a raster GIS

NUMBER 8

SPECIAL REVIEW ISSUE

Editorial	v	
Nicholas M. S. Rock	1067	Progress in 1988–1990 with computer applications in the "hard-rock" arena: geochemistry, mineralogy, petrology, and volcanology

John C. Tipper	1091	Computer applications in paleontology: balance in the late 1980s?
John M. Reynolds	1099	The need for recognized standards of applied geophysical software and the geophysical education of software users
F. P. Agterberg and C. M. Griffiths	1105	Computer applications in stratigraphy 1989/1990: a review
Michael J. Bellotti and William Dershowitz	1119	Hydrogeological investigations: data and information management
Steven E. Franklin	1137	Image transformations in mountainous terrain and the relationship to surface patterns
Steven E. Franklin and Bradley A. Wilson	1151	Spatial and spectral classification of remote-sensing imagery

NUMBER 9

S. Radhakrishnan, G. Srikanth, and C. H. Mehta	1173	Segmentation of well logs by maximum likelihood estimation: the algorithm and FORTRAN-77 implementation
J. Contreras	1197	Kinematic modeling of cross-sectional deformation sequences by computer simulation: coding and implementation of the algorithm
W. Eberhard Falck	1219	Multisite binding equilibria and speciation codes: incorporation of the electrostatic interaction approach into PHREEQE
David Cohen and Colin R. Ward	1235	SEDNORM—a program to calculate a normative mineralogy for sedimentary rocks based on chemical analyses
L. A. Rasmussen	1255	Piecewise integral splines of low degree
Denis Marcotte	1265	Cokriging with Matlab
A. Taboada, C. Tourneret, and P. Laurent	1281	An interactive program for the graphical representation of striated faults and applied normal and tangential stresses
I. M. Navon and Jian Yu	1311	EXSHALL: a Turkel–Zwas explicit large time-step FORTRAN program for solving the shallow-water equations in spherical coordinates
Reviews	1345	

NUMBER 10

Emmanuel O. Udegbunam	1351	A FORTRAN program for interpretation of relative permeability from unsteady-state displacements with capillary pressure included
Gert W. Wolf	1359	A FORTRAN subroutine for cartographic generalization
R. Marschallinger	1383	Interface programs to enable full 3-D geological modeling with a combination of AutoCAD and SURFER

Raghu K. Chunduru, R. Nagendra, and N. S. Patangay	1395	RESDYK—a FORTRAN program for computing apparent resistivity over an infinitely deep outcropping vertical dike
James R. Carr and M. J. Hibbard	1409	Open-ended mineralogical/textural rock classification
J. P. Le Roux	1465	Paleocurrent analysis using Lotus 1-2-3
J. P. Le Roux	1469	A spreadsheet model for integrating stratigraphic and lithofacies maps
Alan P. Boyle	1473	Simultaneous solution of geobarometers and geothermometers using a microcomputer spreadsheet
P. A. Dowd	1481	A review of recent developments in geostatistics
